

Excel Data Cleaning & Inventory Tracker

A practical sample showing accurate data entry, consistent formatting, simple validation, and formula-based inventory monitoring.

01 TASK

Organize a fictional product list into a clean, filterable Excel table for a small retail business.

02 WHAT I PREPARED

Standardized SKU and category fields, formatted prices and quantities, added reorder logic, and included an inventory-value calculation.

03 QUALITY CHECKS

Frozen headers, alternating row styling, clear column names, table filters, and formulas that can be reviewed or extended in Excel.

04 RELEVANT SKILLS

Data Entry • Microsoft Excel • Inventory Organization • Attention to Detail

TRANSPARENCY NOTE

This is a self-initiated fictional portfolio sample. Names, products, records, figures, and results are illustrative and not client work.
